

Total Light Technology

Everything You Need To Know

Ergoline

Next Level Tanning & Skincare | TLT Maximum Session Time: 12 Minutes

What is Total Light?

Total Light combines activating Blue Light and enhancing Red Light in a single session.

Experience advanced tanning with personalized skincare options.

Why use Total Light?

Achieve a more efficient tan, more natural-looking and longer-lasting.

Total Light combines the benefits of red & blue LED's with UV light to offer a better tan and with skincare.

The unique combination of UV, Red Light, and Blue Light in harmony delivers a more natural-looking, longer-lasting tan with skincare benefits.

Experience a skincare-only session, non-uv light option using only Red & Blue Light LED's.

Frequently Asked Questions

What is Total Light Technology?

Total light technology is the combination of UV, Red Light & Blue Light. This next level combination of light provides the most optimal tanning experiences and vivid color results.

What are the Blue & Red LED's in the Total Light and can you turn off UV completely?

The Blue LED's activate the tanning experience and the Red LED's offer additional skincare benefits. Tanners have the option to turn off UV completely in the Total Light for a Blue & Red Light LED only experience.

How many sessions do I need before I start to see results?

You will begin to see improved tanning results in as little as two to three sessions.

Can I select Red Light & Blue Light only?

Yes, the TLT is completely customizable, allowing you to select the option for non-uv using

Who Should NOT use the Planet Fitness Hybrid Light Technology by Ergoline?

If you are pregnant, consult with your physician. If you have an illness that causes light sensitivity. If you have epilepsy and/or seizures. If you are on prescription or herbal medications that cause light sensitivity. Check with your doctor before using any tanning equipment or service. Please read carefully the warning labels located on the device.

*** Note:** The manufacturer makes no claims about Total Light Technology health-related benefits.
