# Frequently Asked Questions

## What is Pure Light UV?

Pure light is an elevated way to tan. Pure Light UV offers an enhanced tanning experience for optimized results. The addition of UVA LEDs in the face and body provides a relaxing and comfortable experience.

## What are the UVA LED's in the face?

The UVA LEDs provide a more energy efficient and comfortable experience for the tanner. With less heat output for the tanner and the gym, the temperature in the room is better controlled, and the tanner experiences a more comfortable and relaxing session.

## How many sessions do I need before I start to see results?

You will begin to see improved tanning results in as little as two to three sessions.

If you are pregnant, consult with your physician. If you have an illness that causes light sensitivity. If you have epilepsy and/or seizures. If you are on prescription or herbal medications that cause light sensitivity, check with your doctor before using any tanning equipment or service. Please carefully read the warning labels located on the device.

**\* Note:** The manufacturer makes no claims about Pure Light Technology health-related benefits.
